U.S. Patent and Trademark Office PTOL-303 (Rev. 9-04)

Continuation of 3. NOTE: In view of amended Claim 1, the melt flow index of Claim 2 was incorporated in as the property limitatiion for the claimed copolymer of TFE and FMVE. It is not deemed to place the application for allowance since it would reguire further search and consideration. As discussed in previous Final rejection, this MFI limitation in original claim 2 was rejected by 102(b) and/or 103(a) with different reasons including inherent .property. The Applicants have provided two key arguments: (a) and (b) on pages 5-6 of Remarks.

As known in the art, some prior art may carry some PTFE copolymers with such an inherent property. In the particular case of using other lower PAVE for copolymerization with TFE, whether the resultant polymeric product have the same or similar claimed properties is still need to be checked.

A new or further consideration and search is thereby required to be sure of the effect on using different length of PAVE. If the effect is not the same, it is still needed to check whether functional equivalence in get the same MFI is existed between different species of PAVE.
